

The world's smallest gym of the Easy Motion Skin series is an EMS system for the private user, which combines all the benefits of the Easy Motion skin system and provides the user with the maximum added value.

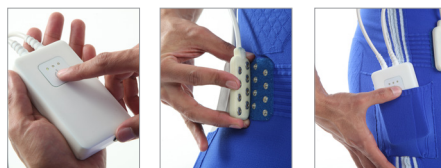

The scope of delivery includes the personal Motion Skin in the selected size, the Powerbox, as well as an individual training license, thereby offering all the elements for a full-featured EMS training. Due to sports-medical reasons, the muscle-building programs are limited to the maximum dosage recommended by doctors. The license covers two muscle-building training sessions per week, with an interval of at least 36 hours between the 85 Hz-training sessions. However, you can take advantage of all the regenerating-, as well as the endurance- and metabolism-stimulating programs of Easy Motion Skin. The limitation only applies to the highly-intensive power-training sessions and is for your own protection!

## MotionSkin

Available sizes

## Powerbox

## App

1x Easy Motion Skin® license  
(private operating license for a Powerbox)
